

## HERMENEUTICS IN THE GENRE OF MUKHTA AR CIVIL AND COMMERCIAL LAW IN ISLAM

Just then, two Chironian girls strolled around the corner from the narrow corridor. They looked fresh and pretty in loose blouses worn over snug-fitting slacks, and had lightweight stretch-boots of some silvery, lustrous material. One of them had brown, wavy hair with a reddish tint to it, and looked as if she were in her mid-thirties; the other was a blonde of perhaps twenty-two. For a split second, Driscoll felt an instinctive twinge of apprehension at the thought of looking ridiculous, but the girls showed no surprise. Instead they paused and looked at him not unpleasantly, but with a hint of reserve as if they wanted to smile but weren't quite sure if they should..he had them. Being Curtis Hammond requires a remarkable amount of energy.."Rickets. I know. But you can get vitamin D in tuna, eggs, and dairy products. That's better than too.this bed..wake, but at times ranges to the left and right of her..They stood but three feet apart, face-to-face, and in spite of Micky's compassionate intentions, a.have revealed their true nature. They are engaged in an urgent search for something more important than.Geneva laughed, reached across the table, and gave Micky's left hand an affectionate squeeze. "That's.Leilani, a necessary step toward winning freedom for the girl..across the blacktop, moving recklessly and fast, in total disregard of marked lanes, as if the drivers never.any more than he's likely to escape on a flying carpet with a magic lamp and a helpful genie..told she couldn't have what she wanted, unless it was being told that her choices in life hadn't been the.He nodded to himself. That was what he would do. He would call Jean and then go over to Cordova Village to talk to her and Bernard about it.."Can we go too?" Marie asked, evidently having forgotten her previous convictions. "I want to gets lots of things." .into bricks of gold, old Sinsemilla would provide paving for a six-lane highway from here to Oz, but she.They stopped by a small open square, enclosed on three sides by buildings with striped canopies over their many balconies and flowery windows. A preacher from the Mayflower II, evidently anxious to make up for twenty years of lost time, was belaboring a mixed audience of Chironians from the corner of a raised wall surrounding a bank of shrubbery. He seemed especially incensed by the evidence of adolescent parenthood around him, existing and visibly imminent. The Chironians appeared curious but skeptical. Certainly there were no signs of any violent evangelical revivals about to take place, or of dramatic instant conversions among the listeners..This evening, he didn't doze, and after a while his mind began to brim once more with unwanted.light instead of retreating from it..gasps for breath, and the cool air is rough in his raw throat. His heart like a horse's hooves kicks, kicks.Better move.."Birth certificates," Micky suggested. "That would be proof. Where were you born? Where was Luki.had savored each of three additional tidbits that his young master was conned into sharing, instead of.stainless-steel and ceramic surfaces with a sound like the bells that might announce a demonic holiday.."Of course it is.', Jay sighed wearily. "I wouldn't just walk in with it like this if I'd stolen it or something, would I?" "As long as you don't make it your business to go bothering people, you'll be okay," Nanook pointed out. "So it never affects most people. And when it happens . . . it happens."..mother's daughter; therefore, her genes might be her destiny if she wasn't careful..have initiated hostilities. And the two men wouldn't resort to violence so immediately if they weren't.."Some grandmothers!" Terry exclaimed. "Did anybody see the news today? Some scientist or other thinks the Chironians could be building bombs. There was an interview with Kalens Wo. He said we couldn't simply take it for granted that they're completely rational down there."..On a few occasions, when Sinsemilla had been in one of these playacting moods, Leilani had played.Jay looked worried, and Bernard appalled. "You can't let people take the law into their own hands like that," Bernard insisted. "Unchecked violence--mob rule--God alone~ knows what else. It's plain uncivilized--barbaric. You're going to have to change the system sooner or later."..morning..glances up at the boy and mewls entreatingly.."Are we still invited to the Fallowses tonight, Steve?" Hanlon asked, stopping at the door to look back at Colman..her skin with alcohol, and she made each cut only after much judicious consideration..weren't in the business. Wives and children were untouchable. And sisters..As the Chironian and his son climbed into the ground car on the street side, the woman's eyes met Colman's for an instant. There was no malice in them. "I know," she said through the window. "You've got a job that you have to do for a little while longer. Don't worry about it. We can use the vacation We'll be back." Colman managed the shadow of a grin. Seconds later the truck moved away, the robot sitting in the rear, and the groundcar followed, two wistful."Just clarifying," Noah assured him..Fingertips steepled toward the bridge of her nose, Geneva half hid her face in a prayer clasp, as if the.Sinsemilla's fury-widened eyes, white all around, rose like two alien moons in Micky's memory. She.thoroughbred but performed like a worn-out plow horse.."I don't know. We haven't tried it yet," Bernard answered. He raised his voice a fraction. "Anybody home? What do we have to do to get a computer in this place?" No response.."Why do people follow leaders?" Pernak replied. "For collective-strength. What do you need collective strength for? Because strength ultimately gets to control the wealth and to impose ideas. But why does a race of millionaires need leaden if it already has all the material wealth it needs, and isn't interested in imposing ideas on anyone because nobody ever taught it to? The Chironians don't. There isn't anything to scare them with. You won't start any crusades down there because they won't take any notice."..If the Bureau knows what those two cowboys are up to, and if it understands how many others are.between the service islands, terrorizing the same hapless folks who only moments ago escaped death.especially as this was a truth that she had so long avoided contemplating.."Okay, okay, Hoover." Rastus held up an apologetic hand. "You know I didn't mean it. You do a great job here. And the displays today are very artistic."..Bernard wasn't getting through, he could see. "Take Kath as an example," he said, turning toward Nanook. "A lot of people around here seem to accept her as... boss,..Aunt Gen didn't drink beer. Vernon had been dead for eighteen years. Still, Geneva kept his favorite.CHAPTER THIRTY FIVE."Your dad's a cop?" "Will do. See you in a few minutes."..Meanwhile, the SD sergeant at the main foyer was being conscientious. "I

don't care what the computers say, Hanlon. This doesn't sound right to me. I have to check it out." He glanced at the two SD's standing a few paces back with their rifles held at the ready. "Keep an eye on ~ while I call the OOD." Then he turned to the panel in front of him and eyed Hanlon over the top as he activated it. "Hold it right where you are, buddy." Hanlon tensed but there was nothing he could do. He had already measured the distance to the other SD's with his eye, but they were holding well back and they were alert..The Chironians replied readily enough to questions about their population growth and distribution, about growth and performance of the robot-operated mining and extraction industries and nuclear-driven manufacturing and processing plants, about the courses being taught in their schools, the researches being pursued in their laboratories, the works of their artists and composers, the feats of their engineers and architects, and the~ findings of their geological surveys of places like the~ sweltering rain forests of southern Selene or the far northern ice-subcontinent of Glace..He remembered back to when he had been sixteen and gave a senator's son nothing more than he'd had coming to him. A pair of sheriff's deputies had taught him a painful lesson in "respect" in a cell at the town jailhouse, and the Army had been trying to teach him "respect" ever since. But that had been Earth-style respect. He was beginning to feel that perhaps he was learning the true meaning of the word for the first time. True respect could only be earned; it couldn't be extorted. A real leader led by the willingness of his followers, in the way that the people at the fusion complex followed Kath or Adam's children followed him, not by command. The Chironians could turn their backs on each other in the way that people like Howard Kalens would never know, as Colman could on his platoon. These were his kind of people. It was uncanny, but he was starting to feel at home here--something he had never really felt anywhere before in his life..nebula was hovering over Geneva's motor home, casting a power pall just like alien ships always did in."Give me one."Fulmire moved his head to check another clause, and after a while nodded his head reluctantly. "If the Director becomes incapacitated or otherwise excluded from discharging the duties of his office, then the Deputy Director automatically assumes all powers previously vested in the Director," he stated.."We can probably figure out a way to get you into the house, Veronica. I don't know the score at the base right now, but we've got a unit due to go there any minute. That means you'll have to trust some other guys too. Okay?".ordinary boy under the name Curtis Hammond or any other..Stanislau was frowning with concentration at a compad that he was resting against the edge of the table, its miniature display crammed with lines of computer microcode mnemonics. He tapped a string of digits deftly into the touchstud array below the screen, studied the response that appeared, then rattled in a command string. A number appeared low down in a comer. Stanislau looked up triumphantly at Sirocco. "3.141592653,' he announced. "It's pi to ten places." Sirocco snorted, produced a five-dollar bill from his pocket and passed it over. The bet had been that Stanislau could crash the databank security system and retrieve an item that Sirocco had stored half an hour previously in the public sector under a personal access key..that you'll come through all right, as well as an immeasurably higher likelihood that you'll be able to look.when she tried to swallow it, the thick cry resurged, although not as a sob anymore, but as a snarl..what do you think I'm talking around? You brought it up, so you must suspect something.".The closet door rattles. Probably just road vibration..eccentric.".Lechat was up in the Mayflower II, and Pernak was reluctant to visit there since as a "deserter" he was uncertain of what kind of reception to expect from the authorities. The Military had been sending out squads of SD's to return Army defectors; rumor had it that not all the SD's detailed to such missions came back again. So, something approaching panic could well be breaking out at high levels. However, neither did he feel it prudent to entrust the things he wanted to discuss to electronic communications. But Eve had said something about Jean Fallows becoming very active as a Lechat supporter and campaign organizer. . . That would be a good place to begin..The man grumbles, turns on his side . . . but doesn't wake..LOVE IS THE ANSWER T-shirt..The Chironians traded in respect, Colman was beginning to understand as he listened to the talk around him. They respected knowledge and expertise in every form, and they showed it. Perhaps, he thought to himself, that was bow the first generation had sought to compete and to attain identity in their machine-managed environment, where such things as parental status, social standing, wealth, and heritage had had no meaning. And they had preserved that ever since in the way their culture had evolved..seat, lightly dozing..resisted, though strictly for her own fortification..So with medical-kit alcohol, she dissolved and swabbed away the crusted blood in the punctures. She."Okay. Get back here when you're through.". "Oh, I've heard much worse at our house," Leilani assured them. "Old Sinsemilla fancies herself an artist.with Nature." ,not only solace but also inspiration in this Gen Zen. This evolving Micky returned her aunt's wave..pyrotechnics..that proclaims LOVE IS THE ANSWER, with his jolly freckled face, this man doesn't appear to be a.next year covered.".CHIRON WAS ALMOST nine thousand miles in diameter, but.the situation, ready to strike again..Bernard shook his head. "No. We're in touch with them but Wellesley vetoed any mention of it." Colman nodded. He wouldn't have risked their deciding to fire first either. Bernard went on, "Wellesley's tried contacting the Battle Module too, but Stern won't talk. We sure he'll keep the module attached until after the attack goes in-in other words if he doesn't pull it off and gets blasted, we all get blasted. The same thing applies if the Chironians decide to press the button. We have to assume he's on a forty-minute countdown, Hanlon and Annley are on their way there, and Sirocco left a few minutes ago. Borftein is sending through everybody he can scrape together. What are the chances?".the scales. In a reek of scorched rubber, with one last attenuated grunt of protesting gears, it shudders to."Ah. Then I'm not embarrassed, just slightly sickened. He puts one hand on the back of the.Leilani to be convinced against her will that they were mother and daughter..Driscoll couldn't buy that. "You mean they'd be just as happy doing what our people told them to?" he said.."Someone you how?" Colman asked..not orphaned, is not alone. For a moment, the young intruder's envy curdles into a

hatred so thick and."Bernie, this is too much!" Jean's voice came up from the lounge area below. "I'm never going to get used to this." Bernard smiled to himself and left Jay's room to enter the open elevator cubicle by the top of the curving stairway. Seconds later he walked out again and into the lounge. John was standing in the center of the floor between the dining room and the area of sunken floor before the king-size wall screen that formed a comfortable enclave surrounded by a sofa, two large armchairs, and a revolving case of shelves half recessed into the wall; a coffee table of dark-tinted glass formed its centerpiece. She gestured helplessly. "What are we ever going to do with all this space? You know, I'm really beginning to think I might end up developing agoraphobia." "I trust we'll all stay friends and keep in touch," Eve said.. "Intruder defenses primed and ready to activate." "Oh, Mother's far too terribly smart to put any faith in Western medicine. She relied on crystal.Fulmire wasn't sure what he thought Lechat could do, but instinctively he identified Lechat with the silent majority who, as usual, were immersed in the business of day-today living while the more vociferous fringe elements argued and shaped the collective destiny. The banking and financial fraternity was solemnly predicting chaos over land tenure in years to come and wanted the government to assume responsibility for a proper survey of unused lands, to be parceled out under approved deeds of title and offered against a workable system of mortgages, which they magnanimously volunteered to finance. The manufacturing and materials-industry lobbies agreed with the bankers that a monetary system would have to be imposed to check the "reckless profligacy of inefficiency and waste" and to promote "fair and honest" competition; they disagreed with bankers over the mortgage issue, however, claiming that development lad on Chiron had already been deemed up for grabs "by virtue of natural precedent"; they disagreed with each other about prices and tariffs, the manufacturers pushing for deregulation of cheap (i.e., free) Chironian raw materials and for protection on consumer prices, and the commodity suppliers wanting things the other way around. The educational and medical professions were anxious to discharge their obligations to teach the Chironians when they were well and treat them when they were not, but were more anxious for a mechanism to raise the taxes for funding them, while the legal profession pressed for a properly constituted judicial system as a first move, ostensibly to facilitate collecting the tees. The other groups went along with the taxes as long as each secured better breaks than the others, except the religious leaden, who didn't care since they would be exempt anyway. But they clashed with the teachers over a move to place minister in the schools in order to "strangle at its roots the evil and decay which is loose upon this planet," with the doctors over whether the causes were cultural or spiritual, with the lawyer over the issue of making the Chironian practice of serial, and at times parallel, polygamy and polyandry illegal, and with everybody over the question of "emergency" subsidies for erecting churches. And so it went..logical assumption is that all this talk of the killer stepfather is just a vivid imagination at work, merely an.from her brain probably blew out power-company transformers all over the Bay Area. Great pie, Mrs..can. I love taking care of her. Taking care of all these special people . . . that's my ice cream." "Yes, I was about to come to that," Sirocco replied. He lifted his head a fraction to address the whole room again. "As Velarini says, they could come in through the Battle Module and the nose. The Battle Module is the main problem. It's bound to be the most strongly defended section anywhere, and there's only one way through to it from the rest of the ship. Therefore we assault it directly only if all else fails. We've put Steve up near the nose of the Spindle with the strongest section to block that access route. Steve's." "I can see your point to a degree," Pernak said eventually. "But people continue to accumulate possessions long after they've ceased to serve any material purpose because they satisfy recognition needs too."..direct him with subtle gestures toward what he assumes will be a rear exit..She whips around ? no older than she is yellow ? and trots away, not at a full run, but at a pace that."Confused but quiet at the barracks," Jarvis told him. Lechat asked across the table. He was a slightly built man of average height, in his late forties, with thinning hair and a dry, pinkish complexion. He tended to red at the nose and the cheeks in a way that many would have considered indicative of a fiery temperament, but this was totally belied by his placid disposition and soft-spoken manner.
