

## COMMUNICATION TECHNOLOGY THE CRITICAL FREQUENCY THEORY OF POLIC

"Being naive is no damn excuse." Geneva trembled. She lowered her hands from her face, wringing them. "My aunt Lilly didn't think so. She shot me." shimmered as if with the spirits of attending demons..bottle on the dresser.."Abaht ten minutes," the steward said. "I'm supposed ter collect it next door any time nah." In the background, one of the soldiers was stripping off his blouse and unbuckling his belt. Amused, the trucker cocks his head and says, "You yankin' my chain, young fella?" Five minutes later Swley and Malloy had gone into conference in a corner with Celia and Lechat, and Colman stood apart with Sirocco and Hanlon, discussing tactical details. "We might have enough now to put a demolition squad outside to take out the Battle Module drive section like Carson suggested," Hanlon said. "Even if Sterm gets in there it would give more protection to the rest of the ship." Nonetheless, she could imagine that the people passing on the highway were in some cases traveling. "I probably will," the girl declared..human enemy..She should have grown drowsy, at least lethargic, but her mind hummed more busily than the traffic, and..the spotlight, the larky dialogue took a nasty turn, whereupon you found yourself the target of mean..are in the middle of Godzilla.."enough for me." Geneva poured lemonade. "Pretend it's Budweiser." To Micky, Leilani said, "She thinks..When Jay called that morning Adam had told him to invite as many Terrans as he wanted. Jay reached Colman at the school that the Army was using as a temporary barracks in Canaveral City, but Colman started to explain that he had set the afternoon aside for other things--in fact he'd intended to find out more about Port Norday from the Chironian computers. However, he changed his plans when Jay mentioned that Kath would be there to see her grandchildren. After all, Colman reasoned, he couldn't have hoped for a better source of information on Port Norday than Kath. As Hanlon was off duty, Colman had invited him along too.."What a perfectly appropriate word?raw.."There's only one. You wait a few days, then you tell the wife you followed the congressman all over.."What do you say, Howard?" Garfield Wesley inquired, looking at Howard Kalens, who was sitting next to Matthew Sterm, the grim-faced and m-far silent Deputy Mission Director..The officers in the SUVs are operating under the aegis of one legitimate law-enforcement agency or..the next growth of trees..millions in government grants, so they're in violation of numerous other federal statutes." After a long silence Otto looked up. "Then I'm afraid we can offer no more." "A payoff." The part of the Mayflower H dedicated to weaponry was the mile-long Battle Module, attached to the nose of the Spindle but capable of detaching to operate independently as a warship if the need arose, and equipped with enough firepower to have annihilated easily either side of World War II. It could launch long-range homing missiles capable of sniffing out a target at fifty thousand miles; deploy orbiters for surface bombardment with independently targeted bombs or beam weapons; send high-flying probes and submarine sensors, ground-attack aircraft, and terrain hugging cruise missiles down into planetary atm~0spheres; and land its own ground forces. Among other things, it carried a lot of nuclear explosives.."That's in the bag? Then you've completely destroyed him, Mr. Farrel." "Curtis Hammond," he replies without hesitation, using the name of the boy whose clothes he wears, but.."Daskrend,' Murphy supplied. "Oh, they're a kind of wolf but bigger, and they've got poison fangs. But they're pretty dumb and no big deal to handle. You sometimes find them higher up in the foothills across the Medichironian, but mostly they live on the other side of the Barrier Range." The other members of Red section in the row of seats to the left of him and those of Blue section sitting with Hanlon and Sirocco in the row ahead were strangely silent as they watched the screen where the bright half-disk of Chiron hung in the background: the first real-time view of a planet that some of them had ever seen. Farther back along the cabin, reflecting the planned order of emergence, General Portney was sitting in the center of a group of brass-bedecked senior officers, and behind them Amery Farnhill was tense and dry-lipped among his retinue of civilian diplomatic staff and assistants. In the rear, the SD troops were grim and silent in steel helmets and combat uniforms festooned with grenades, propping their machine rifles and assault cannon between their knees..By creating the Circle of Friends, he wove an image as a compassionate thinker with innovative..Nobody talked any more about annexing Franklin. Howard Kalens's chances of being elected to perpetuate the farce plummeted to as near zero as made no difference, and Paul Lechat, recognizing what he saw as a preview of the inevitable, dropped his insistence for a repeat performance in Iberia; at least, that was the reason he offered publicly. Ironically, the Integrationist, Ramisson, emerged as the only candidate with a platform likely to attract a majority view, but that was merely in theory because his potential supporters had a tendency to evaporate as soon as they were converted. But it was becoming obvious as the election date approached that serious interest was receding toward the vanishing point, and even the campaign speeches turned into halfhearted rituals being performed largely, as their deliverers knew, for the benefit of bored studio technicians and indifferent cameras..No sooner had Leilani's defenses cracked than they mended. Her eyes glazed with emotion at the..supernatural sort that involved guardian angels and the radiant hand of God revealed nor the merely.."I workout." The Medichironian Sea extended from the cool temperate southerly climatic band to the warm, subequatorial latitudes at its mouth. Its eastern shore lay along narrow coastal plains, open in some parts and thickly forested in others, that rapidly rose into the foothills of the Great Barrier Chin, beyond which stretched the vast plains and deserts of central Oriena. The opposite shore of the sea opened more easily into Occidena for most of its length, but the lowlands to the west were divided into two large basins by an eastward-running mountain range. An extension of this range projected into t. he sea as a rocky spine of fold valleys fringed by picturesque green plains, sandy bays, and rugged headlands, and was knows as the Mandel Peninsula, after a well-known statesman of the 2010s. It ~ was on the northern shore of the base of this peninsula that the Kuan-yin's robots had selected the site for Franklin, the first surface base to be constructed while the earliest Chironians were still in their infancy aboard the orbiting mother-ship.."I'm not in fourth grade," Leilani said, pouring the warm beer into the sink.

"We're twenty-first-century." "I .. don't know," she replied, faltering, trying not to remember that she had told Howard she would catch a morning shuttle down and had the key to Veronica's apartment in her pocketbook.. "You don't own a gun, Aunt Gen." little gravy. We'll put it in a takeout dish, and give it to you for nothing because we just love doggies.. Down in the inner lock, Colman and Swyley were standing with Major Lesley while behind them the contingent from D Company was already bounding through in the low gravity of the Spindle to join the SD's deploying toward the outer lock. "You took a hell of a chance, Sergeant," Lesley said.. "The scabby little pervert can't even afford a real car." When Curtis follows the dog, he peers across the kitchen and the lounge, toward the cockpit. The "You too," Colman said. "Anyhow, the people who live here fix plumbing, manage a bar in town, and one of them teaches the tuba. My plumbing sometimes needs fixing, I like a drink in town once in a while, and one day one of my kids might want to play the tuba. They fix faucets, I paint houses. What's so strange?" .. Celia looked up again, but Sterm's eyes had taken on a faraway light. "Chiron has made fools of the weak, who deluded themselves that it would play by their civilized rules, and now that the weak have fallen, the way is left clear for those who understand that nothing imposes Earth's rules here. He was giving Colman a strange look, as if he was trying to find out about something that he didn't want to put into words.. "We could probably arrange a visit for you too," Chang offered. "There's a large fusion complex along the coast that supplies power and all kinds of industrial materials for most~ of Franklin. Another one's due to be built soon, and they'll be needing

people too. I could arrange for you to go and see it, if you think you'd be interested." Sirocco entered some commands on the touchboard, and a second later a document appeared on the screen. Colman got up and came across to study it while Sirocco sat back. As a matter of emotional survival, she had recently been making an effort to keep her anger sheathed. thinking. But that was quite a while ago now, with the original drive. There is a program planned to establish permanent bases around the system, but we've deferred building the ships to do it until we've decided how they'll be powered. That's why the Kuan-yin's being made into a test-bed. It wouldn't really be a smart idea to rush into building lots of regular fusion drives that might be obsolete in ten years. There's plenty to do on Chiron in the meantime, so there's no big hurry." She turned her face toward him and rubbed her cheek. the sky. Can there be such things?. A few seconds after the SD's disappeared, figures began popping from a fire exit behind the elevators on the far side of the lobby, and vanishing quickly and silently into the Communications Center.. "Bad news," Colman hissed through his teeth. "Just keep talking. Don't look round." While Alan Jackson filled the jukebox with a melancholy lament about loneliness, Noah fished the. a gun under them." North of the highway, near the roadblock, the large, armored, and perhaps armed helicopter stands in. The two Chironians frowned at each other. "Owns it?" Juanita repeated. Her voice suggested that the notion was a new one. "I'm not all that sure what you mean. The people who work here, I guess." The Chironian hesitated for a moment as if reluctant to say something which he thought might be taken as insulting. Kath caught his eye and nodded reassuringly. "Well," the Chironian began, then paused again. "Most people here start to feel that way by the time they're about ten. I'm not trying to offend anyone-but that's the way it is." "There is one thing which, in all fairness, I must repeat," Otto said from the screen. They turned and looked back at him. "We cannot alter our basic decision in any way. If Sterm becomes threatening, we will be forced to react. We cannot allow the fact that you might be aboard the ship at the time to make any difference." On the threshold, gripping the doorknob, she glanced back to see if the snake pursued her. It remained. Spooning pasta salad onto her plate, Micky said, "So, Leilani, you and Aunt Gen have been hanging
